

SPOT WELDING MACHINE SW 12000

SW 12000

Complete welding and various function.

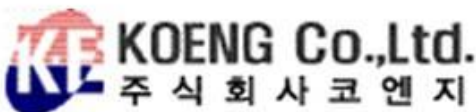

Spot welding machine is the most popular machine in maintenance like repairing companies or plate workshop due to its sufficient welding capacity and various functions.

Features

- Single-side spot welding: Welding only one side if iron plate folded (It can weld twice-folded 1.4mm iron plate).
- Washer (Ring) welding: Welding the washers to pull out the receded part of iron plate.
- Flat work welding: Smoothing out and extruded parts of iron plate.
- Automatic hammer: Be newly designed to perform the repeated washer (ring) welding operations all at once and thereby speed up the welding.

Specification

Model	SW12000
Input Voltage	Single phase 200 ~ 220V, 50 ~ 60Hz, 12KVA
Output Voltage	5 ~ 8V
Safety Device	DC low voltage driving gear
Dimension	680 x 400 x 500
Weight	about 95.5kg
Insulation Type	H type, double insulation
Accessory	Input cable 8m, Output cable 2.5m × 2 Welding tip 2pcs and Earth tip, Washer tip, Flat work tip each Slide hammer 1pcs

RHYTHM SPOT WELDING MACHINE SW 7500

SW 7500

Automobile plate work exclusive use spot welding machine.

It has not only the advantage of small sized machine to easily carry due to its light weight but also the advantage of medium sized machine to be possible to work the soldering of wide range. Additionally it is much more convenient by adding the function of automatic switching which could not be found out in the former machine.

Features

- Single-side spot welding: Welding only one side if iron plate folded (It can weld twice-folded 1mm iron plate).
- Washer (Ring) welding: Welding the washers to pull out the receded part of iron plate.
- Flat work welding: Smoothing out and extruded parts of iron plate.
- Automatic hammer: Be newly designed to perform the repeated washer(ring) welding operations all at once and thereby speed up the welding.

Specification

Model	SW12000
Input Voltage	Single phase 200 ~ 220V, 50 ~ 60Hz, 12KVA
Output Voltage	5 ~ 8V
Safety Device	DC low voltage driving gear
Dimension	460 x 390 x 700
Weight	about 57kg
Insulation Type	H type, double insulation
Accessory	Input cable 8m, Output cable 2.5m × 2 Welding tip, Washer tip, Flat work tip each 1pcs Slide hammer 1pcs

DIGITAL PORTABLE WELDER ASW 3300

ASW 3300

Specification

Model	ASW 3300
Input Voltage	Single phase 200-230V, 50-60 Hz, 3.3KVA 30A
Output Voltage	3~8V 2,800A
Validity	DC low voltage driving gear
Dimension	250 x 320 x 220 mm
Weight	about 22.0kg
Input cable	8m
Accessory	Welding tip, Washer tip, Shrinking tip, Patching tip, Rapid puller and Slide hammer 1 pc each

Features

- Single side spot welding
- Single sided weld on overlapped metals each other(The welding power of ASW 3300 is 0.8mm X 2 of metals).
- Double sided spot welding
- Both-sided spot weld on overlapped metals each other.
- Slide hammer/Washer pulling welding
- Slide hammer is newly designed to perform the washer(ring) welding operations all at once and there by speed up the welding.
- Welding the washers to pull out the receded part of iron plate(body)
- Patching welding
- For a large dent for example, to be a hole or become torn on the motor's body, it's a very useful well just like patch to a vehicle continuous spot weld by rolling of patch up.
- Shrinking Welding/Carbon shrinking welding
- For large dents to plate working to finish.
- When heat expand the metal, push the tip lightly to restore to the original state(Be a help to shrink sprinkle water on the metal).
- Same as "shrinking welding". For very large extrude parts, radiator and soldering.
- Finish up the work in the construction field clearly and rapidly to the veranda stainless steel pipe cap welding

AUTOMATIC SLIDE HAMMER SS 101

SS 101

For quick and efficient work

This is a tool, which is installed spot welding machine for plate work of indented automobile exterior. Also, this tool is improved to use washer welding continuously so fast that the user can work efficiently.

Features

- First, it removes painting of the pressed and indented exterior steel part of the automobile, and welds instantaneously the hammer's tip.
- Then, as hitting backward of the moving hammer makes the indented steel plate return to its original shape.

Specification

Model	SS-101
The thickness of welding rod	5mm
The length of slide hammer	230mm
The length of cable	3m
Dimension	665 x 160 x 80
Weight	about 5.8kg
Reference	For using connect with spot welder
Accessory	none
